Fasteners 201: Behind the Desk

What fastener professionals need to know to fill in knowledge gaps

JUNE 20, 2024 9:00 A.M. – 4:00 P.M.
FULLER METRIC, 9652 188 STREET, SURREY, BC V4N 3M2, CANADA

COURSE OVERVIEW

This new compilation course arrives just in time for the Pac-West After Hours event. Attendees will learn about the basics, standards, terminology as well as strength, hardness, platings, coatings and finishes from expert instructor, Carmen Vertullo. All students will receive the FTI Basic Fastener Workbook.

TOPICS INCLUDE:

- Q & A on some basics
- Standards, including structural standards
- Where and how to find information
- Key terminology including Tensile, Proof Load, Hardness, Go/No-Go, Tolerance, and Core Hardness
- Grading system comparisons
- Grades: why it makes a difference to use the correct grade
- When grades can be substituted
- Call-Outs: do grade and property class specifications matter
- Comparison and benefits of a variety of finishes
- Platings: why it makes a difference to use the correct plating
- When platings can be substituted
