

FASTENER
TRAINING
INSTITUTE

Fastening 101 at Fastener Fair USA

MAY 27 | NASHVILLE, TN

Fastening 101 at Fastener Fair USA is an all-day class brought to you by the Fastener Training Institute. Explore the nuances of fastener applications and design concepts to understand why certain head styles, drive features, thread forms, materials, heat treatments and plating and coatings are used. Come for the class and stay for the show – or come to the show and take the class - and boost your fastener knowledge well beyond the basics.

TOPICS INCLUDE:

- How fasteners are made
- Production methods
- Design and material options
- Head styles and drive features
- Heat treatments
- Platings and coatings
- Engineering concepts
- Torque, tightening, tension, stress and bolt strength
- Market segments

WHO SHOULD ATTEND

OEM's, engineers, sales professionals, quality assurance professionals, purchasers, those in sourcing & quoting, marketing or management and anyone interested in learning more about fasteners.
